

CMRCET Curriculum Management System Dataset

This dataset is created for a Curriculum Management System project for CMRCET (CMR College of Engineering & Technology). The dataset contains sample academic hierarchy including programs, courses, modules, topics, learning objectives, assignments, schedules, and users.

1. Programs

Program ID	Program Name	Duration
P001	B.Tech CSE	4 Years
P002	B.Tech AI & ML	4 Years
P003	MBA	2 Years

2. Courses

Course ID	Program	Course Name
C001	B.Tech CSE	Python Programming
C002	B.Tech CSE	Database Management Systems
C003	B.Tech AI & ML	Machine Learning
C004	B.Tech AI & ML	Deep Learning

3. Modules

Module ID	Course	Module Name
M001	Python Programming	Python Basics
M002	DBMS	Normalization
M003	Machine Learning	Supervised Learning
M004	Deep Learning	Neural Networks

4. Topics

Topic ID	Module	Topic Name
T001	Python Basics	Variables and Data Types
T002	Python Basics	Loops and Functions
T003	Supervised Learning	Linear Regression
T004	Neural Networks	CNN Fundamentals

5. Learning Objectives

Objective ID	Topic	Learning Objective
L001	Variables and Data Types	Understand Python variables

L002	Loops and Functions	Implement reusable functions
L003	Linear Regression	Build prediction models
L004	CNN Fundamentals	Understand convolution operations

6. User Roles

User ID	Role	Name
U001	Admin	Lokesh Admin
U002	Teacher	Dr. Ramesh
U003	Student	Ananya

7. Academic Schedules

Schedule ID	Topic	Date	Time
S001	Variables and Data Types	2026-06-01	10:00 AM
S002	Loops and Functions	2026-06-03	11:00 AM
S003	Linear Regression	2026-06-10	2:00 PM

8. AI Topic Dependency Examples

Deep Learning depends on Machine Learning.
Machine Learning depends on Python Basics and Statistics.
AI engine can automatically rearrange topics based on these dependencies.
